STEAM ENGINEERING.

Proposed Change in Law Regulating the Business.

Commissioner Wight has had prepared a

inspection of stationary steam boilers in

the District. The regulations of other cities were considered in the preparation

of the measure, and practical stationary

steam engineers in the District and in

It became apparent some time ago to Mr. Wight that the present regulations are

Mr. Wight that the present regulations are defective in many respects, one of the most fatal being the inability to punish engineers licensed to operate small plants, but who operate plants of the greatest capacity, embarrassment and danger being caused by this practice.

The bill provides for an annual salary of \$2,000 for the inspector of steam boilers in lieu of the fees he now receives, the fees to be hereafter paid to the District. These fees, it has been found, amount to about \$2,900 per annum. Out of this amount the inspector has paid for an assistant and a horse and wagon. Under the proposed bill his bond will be increased from \$2,000 to \$5,000, and he will be given an assistant, at an annual salary of \$900, the assistant's duties being to aid the inspector and act for him when the latter is on leave or incapacitated.

The fees are to be paid to the collector of taxes, \$3 being charged all applicants for examination. Punishment for intoxication on the part of engineers while on duty is made more severe by the new bill, an engineer so offending to have bit license.

tion on the part of engineers while on duty is made more severe by the new bill, an er gineer so offending to have his license suspended for a year for the first offense, and for a second offense to be forever debarred from engaging in the business of a stationary steam engineer in the D.strict.

Applicants for licenses are to be examined by a board consisting of the inspector and two practical stationary steam engineers, the latter two to receive therefor an annual salary of \$300, and the qualifications of applicants are practically those of the present time.

In recommending favorable action on the proposed bill, Mr. Wight explains that the fees of the office will about pay the salaries proposed, and states that there exists a necessity for the enactment of the measure. The bill will, it is expected, be transmitted to Congress in a day or so.

Mrs. Hobart was superbly gowned in white satin, trimmed with Venetian point, and wore diamonds and pearls. The drawing rooms were profusely adorned with pink roses, and over the wide doorway the Belgian coat-of-arms and the stars and stripes divided admiration.

The doorway was curtained with asparagus garlands. Supper, with all the seasonable delicacies, was served all evening in the supper room, on the first floor, where the decorations were in the Belgian colors.
